

The 9th International Conference on Mathematical Methods in Reliability **MMR 2015, Tokyo** June 1 – 4, 2015

Organized by:

 Reliability Engineering Association of Japan
Institute of Statistical Mathematics
University of Electro-Communications, Tokyo
University of Tsukuba

Supported by:

The International Society for Business and Industrial Statistics
IEEE Reliability Society Japan Chapter

MMR Organizing Committee:

Narayanaswamy Balakrishnan (Canada)
William Q. Meeker (USA)
Vijayan Nair (USA)
Mikhail Nikulin (France, Russia)
Kazuyuki Suzuki (Japan): chair

MMR 2015, Tokyo

June 1 – 4, 2015

Advances in Reliability Theory and Engineering in Big Data Era

Call For Papers

It is our great pleasure to invite you to attend and contribute to the 9th International Conference on Mathematical Methods in Reliability (MMR2015) which will take place in Tokyo, Japan, on June 1-4, 2015, hosted by the Reliability Engineering Association of Japan.

The MMR conferences serve as a forum for discussing fundamental issues on mathematical methods in reliability theory and its applications. It is a forum that brings together reliability engineers in various fields, quality and safety experts, statisticians and data scientists, from within a central focus on reliability. As a major international forum on reliability, it attracts numerous researchers from many different countries, including USA, Canada, South Africa, Japan, Norway, Sweden, France, Germany, Iran, Italy, Poland, UK, Russia, South Korea, Lithuania, Austria, among several others from all across the world.

This ninth conference of the MMR series will be held at Tokyo Campus of University of Tsukuba, which is located in the center of Tokyo. Tokyo enjoys a long history of prosperity as Japan's capital since 1603, when Ieyasu Tokugawa established his shogunate and named the city Edo. Today, with a population of about 13 million, it has grown into the largest of the 47 prefectures of Japan and indeed one of the greatest metropolis in the world. Tokyo is the center of various activities in Japan including politics, economy, and culture.

MMR2015 aims at enhancing international exchanges, at promoting advances in reliability theory and reliability engineering, and at presenting a platform for scientists to discuss emerging issues in reliability engineering and their applications. We sincerely hope you will join us and participate in this event and contribute to its success!

Program Committee:

Narayanaswamy Balakrishnan (Canada)
Tim Bedford (UK)
Maxim Finkelstein (South Africa)
Ilya B. Gertsbakh (Israel)
Catherine Huber (France)
Vasiliy Krivtsov (USA)
Mei-Ling T. Lee (USA)
Axel Lehman (Germany)
Nikolaos Limnios (France)
Bo H. Lindqvist (Norway)
Anatoly Lisnianski (Israel)
William Q. Meeker (USA)
Mikhail Nikulin (France, Russia)
Nozer D. Singpurwalla (USA)
Kazuyuki Suzuki (Japan)

Key Dates:

November 30, 2014
Invited sessions: Proposal deadline
December 31, 2014
Contributed sessions:
Extended abstract submission deadline
February 2, 2015
Confirmation and acceptance of extended abstracts
June 1 -4, 2015
MMR 2015 Conference in Tokyo

Local Organization Committee:

Tomoaki Akiba (Chiba Institute of Technology)
Tadashi Dohi (Hiroshima University)
Yu Hayakawa (Waseda University)
Makoto Itoh (University of Tsukuba)
Lu Jin (University of Electro-Communications, Tokyo)
Mitsuhiro Kimura (Hosei University)
Naoki Makimoto (University of Tsukuba)
Sadaaki Miyamoto (University of Tsukuba)
Hideki Nagatsuka (Chuo University)
Hiroyuki Okamura (Hiroshima University)
Yasufumi Saruwatari (University of Tsukuba)
Masahito Shimazaki (Akita Prefectural University)
Kazuyuki Suzuki (University of Electro-Communications, Tokyo)
Nobuyuki Tamura (Hosei University)
Yoshinobu Tamura (Yamaguchi University)
Kenji Tanaka (University of Electro-Communications, Tokyo)
Koichi Tokuno (Tottori University)
Hiroe Tsubaki (Institute of Statistical Mathematics)
Yasuhiro Tsujimura (Nippon Institute of Technology)
Shu Yamada (University of Tsukuba)
Hisashi Yamamoto (Tokyo Metropolitan University)
Watalu Yamamoto (University of Electro-Communications, Tokyo)
Shinji Yokogawa (Polytechnic University)
Tetsushi Yuge (National Defense Academy of Japan)
