

INSTRUCTIONS FOR MMR2015 MANUSCRIPT PREPARATION*

KAZUYUKI SUZUKI[†]

*Department of Informatics, University of Electro-Communications
1-5-1 Chofugaoka, Tokyo 182-8585, Japan
email: suzuki@se.uec.ac.jp*

SHINJI YOKOGAWA

*Department of Production Management, Polytechnic University
2-32-1 Ogawa-Nishimachi, Kodaira, Tokyo 187-0035, Japan
email: yokogawa@uitec.ac.jp*

This is where the abstract should be placed. The maximum word count is 200 words. It should consist of one paragraph giving a concise summary of the material in the article below. Replace the title, authors, and addresses with your own title, authors, and addresses. You may have as many authors and addresses as you like. It is preferable not to use footnotes in the abstract or the title; the acknowledgments of funding bodies etc. are to be placed in a separate section at the end of the text.

Keywords: Five keywords at most.

1. Guidelines

1.1. *Producing Hard Copy*

All submissions must be written in English, and should be about 4 pages and no more than 8 pages. ^a You can delete our sample text and replace it with the text of your own contribution to the proceedings. We suggest you copy this format file to prepare your paper.

The proceedings trim size will be 9 by 6 inches; however you should submit your copy on standard A4 size. The text area including page numbers should be 7.35 by 4.5 inches, except for opening page. The text should

*This work is supported by Project No., Support Foundation.

[†]Corresponding Author, Tel.: +National Code-Area Code-Phone No. ext. Extension No.

^aSince we plan to prepare the conference proceedings in electronic form, the number of pages of your manuscript has a tolerance interval.

be set in 10pt Roman with a leading (interline spacing) of 13pt. Type the title of the paper in 11pt boldface and in upper case. First level section headings are in 10pt boldface, upper and lower case. Second level section headings are in 10pt bold italic, upper and lower case. If a third level is required then those section headings should be 10pt italic.

Authors' names are set in 9pt and in upper case. Addresses are in 9pt italics. The abstract, figure and table captions should be in 8pt.

All headings should be separated from the text preceding it by a space of about 12pt and by 6pt from the subsequent text.

1.2. Tables and Figures/Illustrations

The caption heading for a table should be placed at the top of the table, and that for a figure should be placed below. Leave one line space between captions and tables or figures. Center the caption if the caption is less than one line. Very large tables and figures should be placed on a page by themselves. The style and font size are listed in Table 1.

Table 1. Type size for camera-ready paper

MMR2015 Style Name	Font Type	Font Size	Use for
Title	Bold	11pt	PAPER TITLE
Author	Regular	9pt	AUTHOR NAME
Affiliation	Italic	9pt	Author Affiliation
E-mail	Regular	9pt	author-email@xxx.xxx
Abstract	Regular	8pt	Abstract
Heading 1	Bold	10pt	Section Heading
Heading 2	Bold & Italic	10pt	Subsection Heading
Heading 3	Italic	10pt	Section Heading
Caption	Regular	8pt	Figures and tables captions that is more than one line
Caption + Centering	Regular	8pt	Figures and tables captions that is less than one line
Equation		10pt	Equation
Text	Regular	10pt	Main Text
Footnote	Regular	8pt	Footnote
Reference	Regular	10pt	Reference Text
List + number	Regular	10pt	List numbering
List + itemise	Regular	10pt	List itemising

Authors are advised to prepare their figures in black and white. Please prepare the figures in high resolution (300 dpi) for half-tone illustrations or images. It is best to mention each figure in the text where it is first required,

e.g., see Figure 1. Please note that the conference proceedings printout will be realised with grayscale pictures. Please check the readability of your coloured figures after they have been printed in grayscale. Moreover, set the size figure such that the font size in figure is similar to the font size in main text.

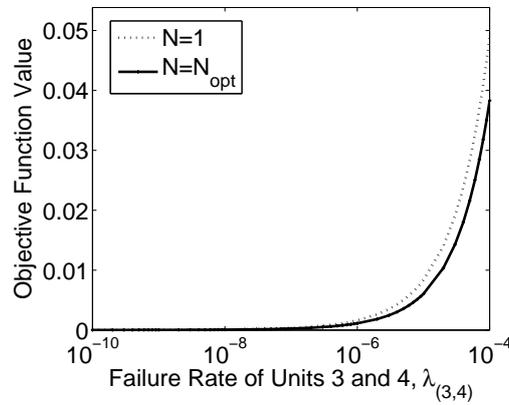

Figure 1. Objective function as a function of failure rate of unit 3 and unit 4. (This is the case of a long caption)

1.3. Equations and Mathematical Text

Equations should be centered and numbered consecutively, as in Eq. (1).

$$M(T) = C_u \bar{U}(T) + \bar{C}(T) \quad (1)$$

An example of long sets of equations is given below,

$$\begin{aligned} \bar{U}(T, L) = & -\frac{1}{3}C_u(1-\rho)^2\lambda^2T^2 + \frac{1}{2}C_u(1-\rho)^2\lambda^2LTT \\ & + C_u(1-\rho)^2(\lambda^2\tau + \lambda) - \frac{1}{2}C_u(1-\rho)^2\lambda^2L^2 \\ & + C_u(2\rho - \rho^2) - C_u(1-\rho)^2 \left[\frac{3}{2}\lambda^2\tau^2 + 3\lambda\tau \right] \end{aligned} \quad (2)$$

1.4. Lists

Lists can be numbered:

1. Everyone is invited to submit work to MMR2015.
2. The paper format can be found on the conference website.

or itemised using symbols. For example, the important dates of MMR2015 are:

- 30 November 2014 Invited sessions proposal due
- 31 December 2014 All papers due
- 2 February 2015 Acceptance notification
- 28 March 2015 Presenter registration due
- 1 April 2015 Program announcement
- 1-4 June 2015 MMR2015 Conference

1.5. *Acknowledgments, Appendices, Footnotes and the Bibliography*

The acknowledgements may be placed in a separate section at the end of the text, before the Appendices.

If Appendices (not recommended in this 4 page extended abstract) are required in your work, they should be placed in separate sections with headings as Appendix A, Appendix B, etc.

Footnotes are denoted by symbols or characters superscript in the text^b. The font size of footnote is 8pt. Reference are cited using bracketed numbers. For example, we use hazard rates that are monotonic in nature from De Wet et al. [3].

Acknowledgments

This is where one acknowledges funding bodies etc. Note that section numbers are not required for Acknowledgments, Appendix and References.

Appendix

Appendices should be used only when sophisticated technical details or tables are required, but would disturb the flow of the text. If there is more than one appendix, number them alphabetically.
